Response to Amendment

This Office Action is in response to a communication made on April 8, 2005.

The Supplemental Application Data sheet was received on February 26, 2005.

Claims 1-9 are pending in this application.

Claims 1-9 are allowable over the prior art on record.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the examiner has found that the prior art of record does not teach or suggest or render obvious an e-mail add-on system that uses a domain suffix of an e-mail address as defined syntax for presenting add-on services at a service mail server. More specifically, the prior art based on the newly added priority date, does not disclose or teach a add-on service server in an email system, which contains series of definitions for syntax to be added onto the suffix of domain of the formally registered e-mail address in the form of USERID@DOMAIN.suffix and also that these services are applied at a mail server installed at an Internet host having a domain name and identified by a meta domain name system, which makes a new message address to the formally defined email address and applying services to the mail message according to the contents of the root domain suffix and supplementary domain suffix specified. These differences are present in the specification and independent claims 1 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent No. 5805810 issued to Maxwell, because it discloses a add-on service for email messages, which includes receiving messages at a relay server and checking the email address for information to form a new mail message.

U. S. Patent No. 6519646 issued to Gupta, because it discloses a relay server that receives resource address locations with additional extension information that whose syntax provides the relay server information about how to handle the request.

WO 02/065320 issued to Sheldon, because it uses suffix information of an email address to decide what to do with received email messages.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Bates whose telephone number is (571) 272-3980. The examiner can normally be reached on 8 am - 4:30 pm.
